

Functional principle of myREX24

**myREX24, VPN portal**

The VPN portal myREX24 serves as a mediation server for VPN communication between the provider of remote maintenance and the customer facility:

This means both sides can establish the VPN tunnel as an outgoing connection.

Firewalls and limitations of services or mobile operators are thus no longer an issue, because these only limit data traffic into the network and not out of the network. The outgoing connections are briefly on hold until the VPN tunnel is established, and then the actual communication takes place there.

In order to use the myREX24 system, all that is required is an Internet connection and an access account, which is set up once. The configuration of the REX router is also created on the portal and can then be easily transferred to the router.

The myREX24 VPN portal is hosted at a high-performance data center. A redundant connection with 365/24/7 monitoring guarantees an average annual network availability of at least 99%.

**YOUR ADVANTAGES**

- Redundant portal hosting (>99 % availability)
- shDIALUP software for easily establishing a connection from a PC
- Configuration of the REX router on the myREX24 VPN portal
- User and permissions management system
- Reports on every single connection that is established
- myREX24 company edition – exclusive server with high reliability and its own IP address

**Note**

You can find additional information and ordering data on page 50.

**myREX24 company edition**

Do you want your own mediation server for your company?

Is your IT department demanding a closed system?

Do you need complete system performance for your own remote maintenance applications?

Do you need special functions?

Then use the “company edition” of myREX24. We host the system exclusively for you in a professional data center.

**YOUR ADVANTAGES**

- High reliability through exclusive redundancy
- Individual customized design
- Exclusively for your business
- A variety of performance variants

**Note**

You can find additional information and ordering data on page 50.

**REX Global SIM**

The prepaid card REX Global SIM is specially designed for teleservice and M2M applications. It is used for global connectivity of the REX industrial router to the VPN portal myREX24 – for data capture, visualization, alerting, teleservice, or direct M2M communications.

**FEATURES**

- Network coverage in more than 50 countries worldwide
- Two possible rate zones (Europe and worldwide)
- No contract
- Support for GSM services (3G data and SMS)
- Simple, transparent pricing with no hidden costs
- Convenient management of multiple SIM cards on the MyM2M portal

**shSMS**

You can use myREX24 to activate a REX GSM router with an SMS text message. The SMS text message is sent to the defined cellular network number autonomously by the myREX24 portal using shSMS.

**FEATURES**

- Activating connections from myREX24
- Phone number stored in the configuration
- Simple cost control
- Sending of alarm SMS messages from devices without mobile connectivity

**WEB2go**

WEB2go is designed to enable you to monitor your equipment even when you are on the go by allowing you to retrieve the most important equipment data on your smartphone or tablet computer.

**FEATURES**

- Easy access through an HTML5-enabled web browser
- HTTPS encryption
- No additional software or app needed
- Ideal for mobile remote diagnostics via smartphones or tablet computers
- Monitoring and visualization

## Ordering data for REX Global SIM, myREX24

On this page you will find the ordering data for the REX Global SIM and myREX24 products.  
Our technical sales is happy to help you with questions involving teleservicing.

<b>myREX24 company edition</b>	On request

1) Active connections  
The number of active connections is the number of connections between a user and a REX device. In other words, all users and REX devices can be connected online to myREX24, but an active connection only counts the moment a user connects to a REX.

2) Term  
This license will be automatically renewed for one year unless renewal is canceled at least four weeks before the license expires.
